

Office of Education Improvement & Innovation
Application for School/Program Facebook Spotlight

Innovation: A new idea, method, or device.

Are there ideas, methods, or devices implemented in your school that are “outside the box”?

If so, we would like to hear from you. The Michigan Department of Education, Office of Education Improvement and Innovation (OEII) would like to highlight your program/practices on our [Facebook](#) page.

Please fill out this application form and your school could be our next Facebook Spotlight. If you are selected as the Facebook Spotlight, the OEII Facebook team will work closely with you and your school to arrange a visit to learn more about your program/practices. This will include staff and student interviews, video footage of your program/practices in action, and details about your programs/practices. Your program/practices will be featured predominantly on our OEII Facebook page for a month. We want the world to know that great programs/practices are taking place in Michigan to not only inspire and engage our students, but to also inspire and engage faculty as well as the community.

If you have any questions, please contact Christi Lopez at lopezc@michigan.gov or 517-373-4213.

1. Please describe your innovative program/practices. How long has/have your program/practices been in effect?

2. What are some challenges you have had to overcome in order to make your innovative program/practices effective?

3. What is the ultimate goal of your innovative program/practices?

4. How do you measure success? What data suggests that your innovative program/practice has been successful?

5. What technology or resources are you using in your innovative program/practices?

6. What has been the response from students, parents, and fellow educators?
